

PIXELPRISM.

**Social media marketing,
engineered for enterprise brands.**

Sharp but Alive.

01 / THE PROBLEM

Brand-consistent social at scale is

Enterprise marketing teams juggle dozens of brands, hundreds of products, and a daily content treadmill.

The existing toolchain — scattered Canva files, spreadsheet calendars, and AI tools that don't know your brand — produces inconsistent work, slow turnarounds, and assets nobody can find again next quarter.

WHY NOW

**We built
PixelPrism
for the teams that
have outgrown
“good enough.”**

02 / SOLUTION

PixelPrism is a marketing OS for enterprise brands.

One workspace. Many brands. Every asset, every product, every post — produced, scheduled, and measured in one place.

SET UP YOUR BRAND

Configure once.
Reuse forever.

MAKE THE WORK

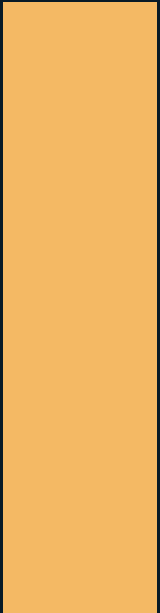

Generate. Refine.
Approve.

PUBLISH & LEARN

Ship the work.
Measure the lift.

ACT I / DIVIDER

ACT I

Set Up Your Brand.

Configure once. Reuse forever.

ACT I / SET UP

One workspace, many brands.

Each brand is its own fully-isolated world inside PixelPrism.

- Spin up dedicated workspaces per brand — separate assets, voice, and team.
- Switch contexts in one click. No cross-contamination between brands.
- Role-based access per brand. Your apparel team never sees your beauty team's work.

BRAND WORKSPACES

STRATUS APPAREL

7.0M followers

AURA BEAUTY

14.3M followers

NORTH WORKS

21.6M followers

FERN & OAK

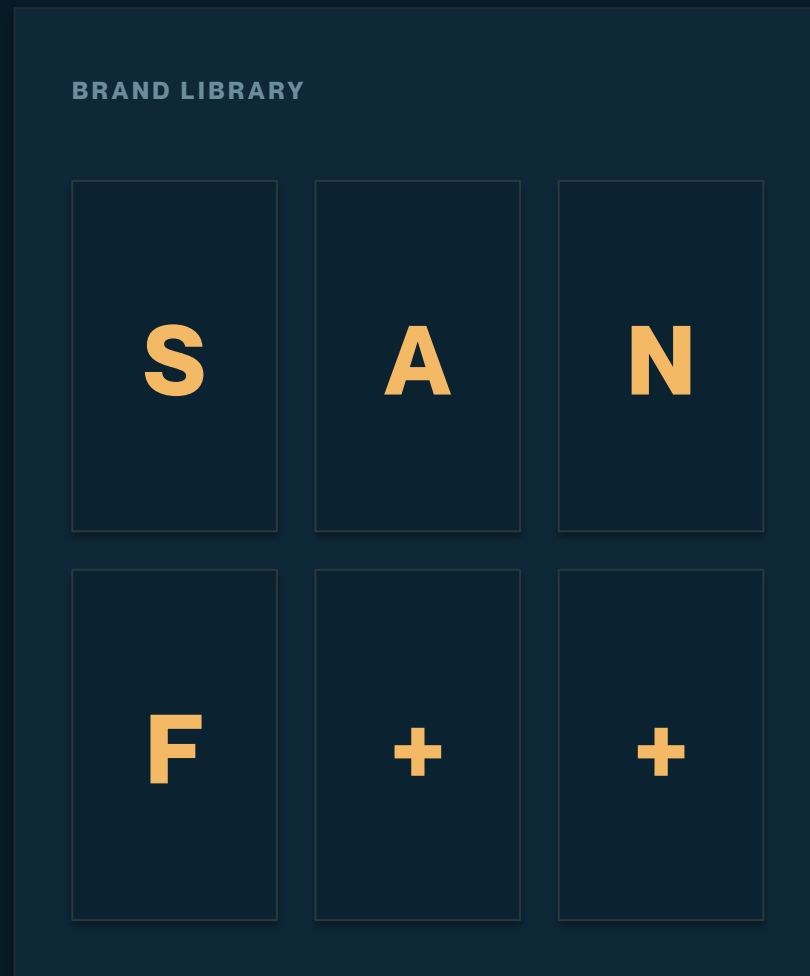

28.9M followers

ACT I / SET UP

Your brand's library, always at hand.

Upload your identity once. The system uses it everywhere you create.

- Logos, color palettes, and reference imagery live in one place.
- Every generated asset pulls from the library automatically.
- No more “where's the latest logo?” Slack threads at 4pm.

ACT I / SET UP

Your catalog, weaponized for content.

Every product becomes a first-class content primitive.

- Each product has an image, story, and metadata in PixelPrism.
- Drag a product into a template — fields auto-fill. No copy-paste.
- When the catalog updates, content updates with it.

PRODUCT RECORD

RUNNER · LIMITED**Stratus Lo Sneaker**

Performance · SS26

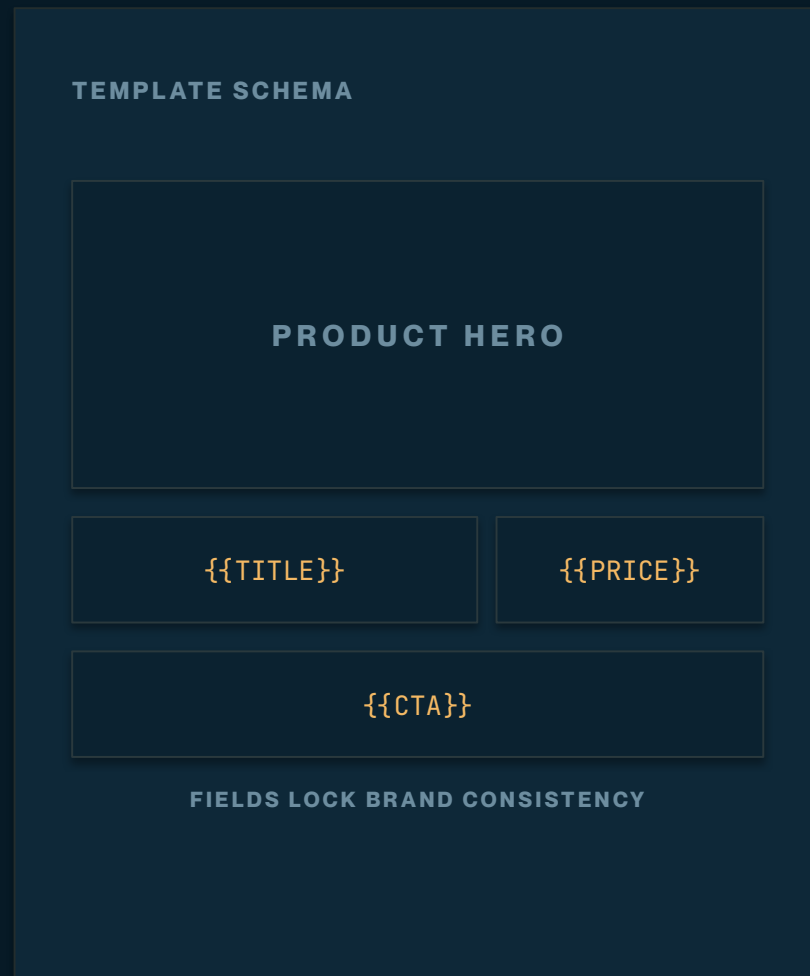

\$ 189.00

ACT I / SET UP

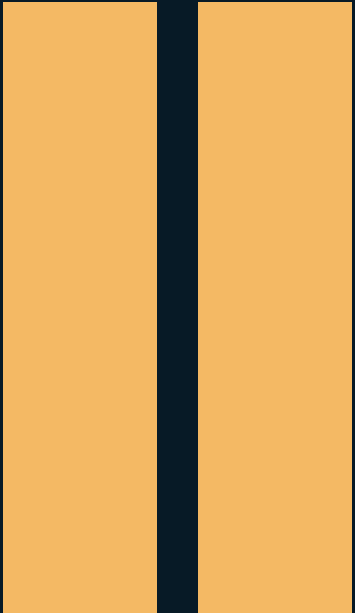

Templates that lock in your brand.

Brand-fielded layouts so no one can drift off-brand by accident.

- Define your most-used post formats — hero shot, product feature, quote card, carousel intro.
- Each template is a layout with brand-locked fields you fill in.
- Onboard a new designer in an hour. The template won't let them break the brand.

ACT II / DIVIDER

ACT II

Make the Work.

Generate. Refine. Approve.

ACT II / CREATE

Studio-grade visuals, generated to brief.

AI image generation tuned to your brand colors, logos, and product imagery.

- Prompt with intent. (“Hero shot, new runner, wet pavement, dusk.”)
- Output respects your palette, your logos, your product shapes.
- Iterate in seconds. Save the keepers. Discard the rest.

BRAND PALETTE

	GOLD #F4B964
	CYAN #64DCF4
	CORAL #E8956A
	LIME #A4F464

ACT II / CREATE

Captions that sound like your brand.

A caption generator that learns your tone — and avoids the tones you've rejected.

- Generate captions, hooks, and hashtag sets in your voice.
- Trained on what you've approved. Avoids patterns you've rejected.
- Built into the scheduler — no more shuffling between tools.

CAPTION DRAFT

DRAFT 03 / TONE: WARM

Made for the long route home.
Engineered to shrug off everything
the sidewalk has in mind.

TONE MATCH

ACT II / CREATE

Approval, without the email chain.

A real review queue per brand — with a clear audit trail.

- Drafts queue per brand. Reviewers approve or comment inline.
- Approved work moves to scheduling automatically.
- Full audit trail: who said yes, who said no, when.

ACT III / DIVIDER

ACT III

Publish & Learn.

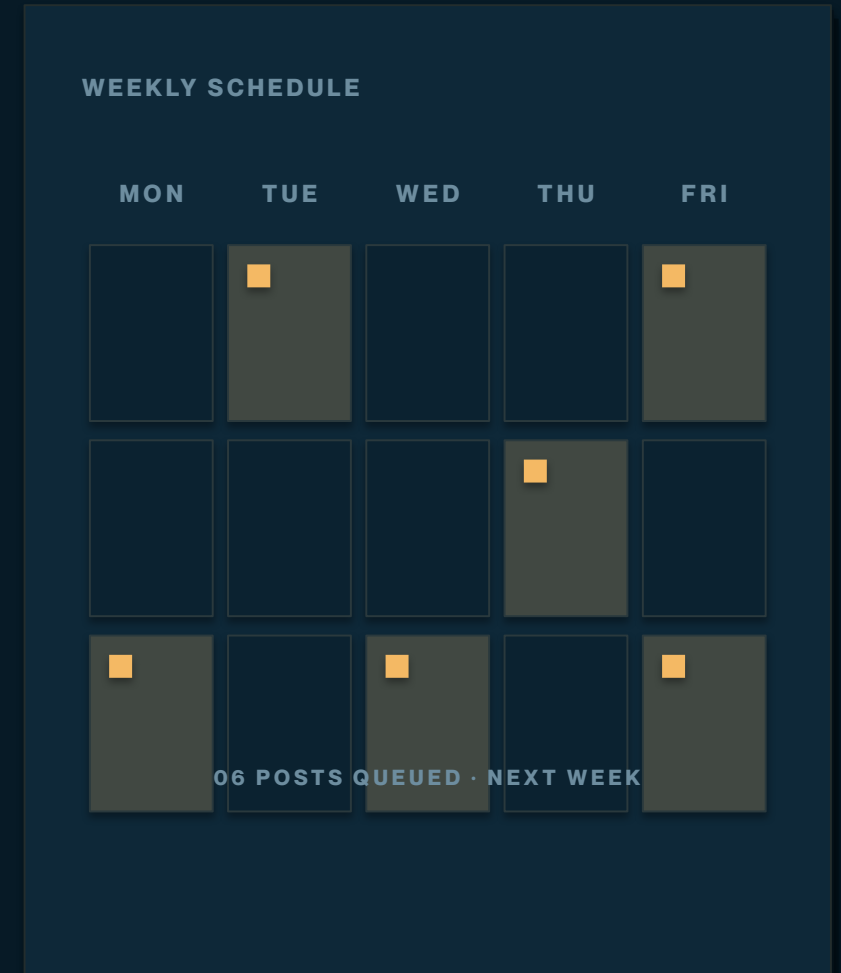

Ship the work. Measure the lift.

ACT III / PUBLISH

Your Instagram calendar, in one place.

Plan the week. Drop in posts. Publish without leaving the studio.

- Drag-drop scheduling per brand. See gaps before they happen.
- Native Instagram publishing — Feed, Reels, and Stories from one composer.
- Reschedule, swap captions, or pause campaigns in a click.

ACT III / PUBLISH

Instagram first. Built to expand.

Today: Instagram. Tomorrow: every channel your team needs.

- Instagram is the launch target. The scheduler is platform-agnostic underneath.
- TikTok, LinkedIn, and X integrations live on the roadmap.
- Same composer, same approvals — more channels, no extra workflow.

ROADMAP

ACT III / LEARN

Performance, per brand.

Engagement, reach, and growth — sliced by brand, post type, and campaign.

- See what's working before the week ends, not after the quarter.
- Compare brands, periods, and post formats in one view.
- Export raw metrics to whatever BI stack you already run.

PILOT RESULTS

+34%

median engagement lift across pilot brands

FOLLOWER GROWTH	+ 12.4 %
REACH	+ 41.0 %
SAVES PER POST	+ 2.3 x

03 / ENTERPRISE READINESS

Built for teams that move serious volume.

Multi-brand isolation, role-based access, and audit trails out of the box.

- Strict per-brand workspace isolation. Nothing leaks across brands.
- Role-based permissions tied to SSO-grade auth (Clerk).
- Audit trails on creative, approvals, and publishing.
- Per-seat or per-brand pricing. Let's tailor it.

04 / ONBOARDING PLAN

Your first 30 days with PixelPrism.

Four weeks from kickoff to compounding output.

WEEK 01

WEEK 02

WEEK 03

WEEK 04

CONFIGURE

Spin up workspaces. Upload logos, products, brand voice. Assign roles.

CREATE

First AI-generated campaigns. Train tone of voice. Approve early drafts.

CODIFY

Lock in templates and approval flow. Document your team's playbook.

COMPOUND

Full publishing cadence live. First analytics review. Plan next sprint.

We're on the call when you need us.

Your kickoff is the start of an ongoing partnership.

- Dedicated kickoff lead for the first 30 days.
- Shared Slack channel with PixelPrism engineering.
- Weekly office hours. Escalation acknowledged within 4 hours.
- Roadmap input — your team helps prioritize what we build next.
